## ABOUT ME

---

I'm a Frontend engineer specializing in React, TypeScript, and Next.js. Focused on creating high-performance applications. Always creating designs that work on all devices and with a great ability to learn quickly and adapt to new technologies.

## EXPERIENCE

---

### Front End Engineer

Greater Odd

Venezuela

Aug, 2025 - Jan, 2026

- I developed the interface for a habit tracker using Next.js, prioritizing speed and efficiency on the client side. I made the application extremely lightweight and fast by optimizing components and using server-side rendering (SSR), ensuring a smooth user experience.
- I designed and implemented an interactive calendar using the Shadcn UI component library, allowing users to easily view their habit history. I also integrated the login flow and ensured the interface was fully responsive using Tailwind CSS.
- I contributed to product development by identifying and resolving interface errors. I leveraged Tailwind CSS to fix visual details and improve user interface consistency, resulting in a stable product that works in all situations.

## SKILLS

---

**Skills:** JavaScript, React, React Native, TypeScript, Next.JS, Astro

## LANGUAGES

---

**English:** Intermediate

**Spanish:** Native
